U50 MK II

- FOR USE IN AREAS WHERE WALL SPACE LIMITED BUT HEIGHT AVAILABLE SUCH AS: LIBRARIES, ARTS & SCIENCE ROOMS AND OPEN TEACHING AREAS
- CAN BE CASTER MOUNTED FOR MOBILITY
- COMBINE A VARIETY OF VISUAL AIDS —
TACKBOARD — upper half of fixed panel
CHALKBOARD — green or black "Alliance P3" or multipurpose white "Alliance P3" (which is an excellent projection screen).

SPECIFICATION:

All double vertical sliding chalkboards shown on drawings shall be U 50 MK II as manufactured by Panel Products, Richmond, B.C. in sizes indicated. All framing shall be 606375 aluminum with exposed surfaces E/S .005 satin anodized finish. Fixed panel shall be (specify upper and lower panel materials desired). Vertical sliding panels shall be "Alliance P3" with aluminum sheet backer. Sliding panels to operate smoothly by counterweights over heavy duty self-lubricating ball bearing pulleys and be equipped with cushioned nylon side guides to eliminate side motion.

Note: The use of "Alliance P3" steel chalkboard for sliding panels, rather than a hardboard type, provides a lighter, stiffer panel with no warpage.
